

QUALITY, ENVIRONMENT AND SECURITY AND HEALTH POLICY

The INACCÉS GEOTÉCNICA VERTICAL SL's Quality, Environment and Safety and Occupational Health policy, which is the result of the management of the company, is aimed at satisfying the needs, expectations and requirements of our clients and the efficiency of the operation of the company in order to strengthen our competitiveness, and has a commitment to minimize and reduce all significant environmental aspects, with the commitment to provide safe and healthy working conditions in order to prevent occupational hazards and injuries and damages to health derived from our activity. To that end, we pursue the strict compliance with the requirements of the client and the applicable legal and regulatory; And we integrate the preventive and environmental activity in all the activities and at all levels of the organization.

To achieve the full confidence of our clients, the maximum respect for the environment and good practices of occupational health and safety, the company provides the human and technical resources that are competent to meet these requirements, as well as the applicable regulatory requirements.

Our mission is to offer comprehensive solutions to geological problems by carrying out safe, effective and quality works that protect people and infrastructures by taking care of the environment and integrating these solutions in the landscape. For this reason we have qualified personnel, specialized machinery and technologically advanced materials, preserving the safety and health of our staff at all times with the commitment of the company to facilitate and foster their participation and consultation about the Health and Safety system and the establishment of objectives.

To this end, the company guides its organization to the recommendations within the ISO 9.001: 2015, ISO 14001: 2015 and ISO 45001: 2018 standards and fosters the use of planning techniques, risk analysis to control the assurance of Quality, good environmental practices, prevention of pollution and the prevention of occupational hazards in:

- A. Study and analysis of the project, formulating, if necessary, optimization improvements.
- B. The execution of the work to achieve the qualitative, environmental and occupational health levels established, strictly adhering to the agreed terms and costs.
- C. The final delivery of the work with all the agreed guarantees.

We want to increase our international presence, strengthen our position as a reference company in geotechnical solutions and continue to focus on the innovation and professional development of people. For all this, Inaccés values the permanent involvement of all its staff, which considers it its most valuable assets. It promotes its continuing professional training and fosters communication and teamwork to foster its active participation in the implementation of new processes, and in the problem solving, in order to achieve a continuous improvement of quality, the environment environment, security and productivity.

INACCÉS GEOTÉCNICA VERTICAL SL likewise considers the most loyal cooperation of its suppliers to be of the utmost importance and which will require the same level of commitment and business competence towards quality, the environment and safety and occupational health, and Therefore, they will be selected by criteria of global evaluation of their organization and of their products and services. The implementation of this policy of quality, environment and health and safety at work is carried out through the **Integrated Quality, Environment and Occupational Health and Safety System**. This system describes procedures, defines objectives and goals, and develops the action plans to achieve them.
